## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 40-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baker et al. '082 in view of Farley et al. '719. Baker et al. teach all of the limitations of the claims except an expandable energy applicator. Farley et al. disclose a similar device that includes an expandable energy applicator that evenly distributes the RF energy along the wall of the anatomical structure. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide an expandable energy applicator on the Baker et al. device to ensure that the energy is evenly distributed.

### ***Allowable Subject Matter***

Claims 45-50 are allowed.
